Crushing Rate (tonnes/hr)	0	198	0	198
Crushing Rate (year to-date)	174	201	162	179

Comments

Harwood

Harwood mill crushed 0t of cane due to significant wet weather preventing Harvesting. The budget for week 19 was 200 t/hr for 122 available hours and therefore 24,400 t.

Lost time: Total lost time for the week was 168hr due to wet weather
Cane analysis: Nil Cane crushed, Nil analysis completed
Bin weights: Nil bins harvested

The opportunity was taken to complete repairs on the evaporator set and the pan vessels. Several other minor repairs were made to prepare for the season finish.

Crushing recommenced 6th Nov at 1:00pm with 4 harvesters active.

Broadwater

A poor week of harvesting and crushing at Broadwater rounded out a fortnight dominated by wet field conditions.
Broadwater recommenced crushing on Saturday morning and crushed only 4,144 tonnes cane (budget 26,832) over only 20.97 hours with an average crush rate of 197.6 tph.

Broadwater has now crushed 341,486 tonnes against an original budget of 451,205 tonnes of cane.

Total lost time for the week was 148.3 hours (budget 39 hours) and included the following stops:
- Clarification – 0.8 hrs
- Crushing – 1.7 hrs
- Cane Supply – 145.8

Average Cane CCS was 12.00 (budget 12.0), cane purity 84.25 (budget 83.6), fibre 16.97 (budget 16.4) and ash 2.55%.
Average bin weight was 25.27 tonnes.

At the end of Week 19 we had approximately 79,000 ton of cane remaining to be harvested however at the time of writing. Approximate 6,000 ton of cane has been withdrawn in Week 20 to date. Growers intending to remove allocated cane please contact our Cane Supply Manager as soon as possible to assist with transport and crushing operational plans.

Condong

No cane crushed for the week due to wet weather.
The Maintenance team have used the downtime to complete a significant number of tasks, the focus has been on providing reliability through to the end of the season.
Approx 116,000t remains to be crushed (<6 weeks).
The DC Raw sugar make for the season is behind budget, primarily due to the extended downtime, Bagging will be maximised through to the end of the crush to attempt to make budget.

Total stoppages for the week was 168 hrs due to wet weather.

Forecast finish date is the 11th of December.
There is still significant lost time factored into the forecasted finish date, with dryer weather and improved harvesting conditions the Mill will be able to process enough cane that reduces the finish date by 1 day for each week of crushing.
