## CSMC

<b>Meeting Title:</b>	Cane Supply Management Committee Meeting	<b>Meeting Date/Time:</b>	16/05/2023 – 13:00
<b>Meeting Type:</b>	Cane Supply Management Committee Meeting	<b>Meeting Location:</b>	Condong Ag House
<b>Meeting Coordinator:</b>	Phillip Scroope	<b>Issue Date:</b>	25/05/2023

Attendee Name	Initials	Present	Role / Organisation / Email
Robert Hawkins	RH	Y	
David Bartlett	DB	Y	
Alan Brown	AB	Y	
Johan Lambrechts	JL	Y	
Aaron Baker	ABa	N	
Phillip Scroope	PS	Y	
Doug Irby	DI	Y	

Notes – Condong CSMC 27/3/23	
Crop Estimate	Agreed on Crop Estimate to be 405,000 tonnes based on the grower estimate. Crushing plan for 405,000 tonnes has a finish date of 24/11/23 if we start on 3/7/23. Was agreed to keep the start date at 3/7/23
Mill Maintenance progress	No issues, not waiting on delivery of any items. In a position to bring start of crush date forward if needed
Production plan	Crop 405,000 tonnes Budgets stops per week 19 hrs inside and 30 hrs outside. With average crush rate 165 tcph gives average 19,600 tonnes crushed each week
Transport	Condong will operate with 6 fully manned quad trailer trucks
Pads	All on track to complete pad remediation and extensions prior to 30 June 2023
CCS allocations of flooded cane	Analysis of the alternative CCS allocation method for cane paddocks where the NIR was deemed invalid has been completed. This exercise has reinforced that the traditional allocation method of highest of previous or subsequent is generally the best outcome, as only a few growers had a better result from applying the alternative method. Will proceed to make the payments to the growers who benefitted from this alternative allocation process.
